PROFESSIONAL SUMMARY

Graduate from the D3 Informatics Engineering program at **Electronic Engineering Polytechnic Institute of Surabaya (EEPIS)** with a GPA of 3.60 and a strong interest in **Mobile Application Development** and **Web Development**. Experienced in UI/UX Design (Figma) and mobile app development using **Flutter & Dart**. Also active as a Frontend and Backend Developer utilizing **PHP, Laravel, JavaScript, Java, Python, and MySQL**. Beyond software development, I have a solid understanding of IT operational support, including **basic network management (TCP/IP, Routing & Switching, Mikrotik/Cisco)** and **troubleshooting** skills to maintain system connectivity and stability. Proficient in building dynamic, responsive, and user-friendly applications. Possess strong teamwork, critical thinking, and effective problem-solving skills.

EDUCATION

Electronic Engineering Polytechnic Institute of Surabaya (EEPIS)

2023 – 2026

D3 Informatics Engineering, PSDKU Lamongan — GPA: 3.60 / 4.00

SMA Negeri 1 Ngimbang, Lamongan

2020 – 2023

Major: Mathematics and Natural Sciences (MIPA)

EXPERIENCE

Software Engineer (R&D; Division) — PT. Pompa DEX Indoguna

Jan 2026 – Jul 2026

- Developed and maintained **Flood Viser**, an internal mobile application used to remotely control and monitor the company's water pump installations distributed across Indonesia.
- Led the ongoing development and maintenance for the **Sparkling Kids** mobile application and website, including the implementation of Live Attendance and AI Report Control Center features.
- Developed an IoT-based fingerprint attendance kiosk integrated with full-stack web and mobile applications.
- Analyzed and optimized water pump energy consumption through integrated software solutions.

R&D; Intern — PT. Pompa DEX Indoguna

Jul 2025 – Jan 2026

- Initiated the early development of the **Sparkling Kids** platform from scratch, including building business flows, mobile applications, websites, core logic, and database architecture.
- Restructured functional flows and redesigned the user interface on the **Flood Viser** web application to improve usability and system efficiency.

Frontend & Backend Developer — Academic & Personal Projects

2023 – Present

- Designed user interfaces using Figma and developed the HIPAM water bill payment mobile application using Flutter, Laravel, and Oracle.
- Built an IoT-based automated school bell system controllable via a website, utilizing Arduino IDE, PHP, JavaScript, and MySQL.
- Developed a Laravel-based daily news website with CRUD features and an admin dashboard integrated with MySQL.
- Built a web-based clinic queuing system to expedite patient registration processes using PHP, JavaScript, and MySQL.

FEATURED PROJECTS

• Flood Viser App & Website (Internal Project, PT. Pompa DEX Indoguna)

An internal web and mobile platform built to remotely control and monitor water pumps installed across Indonesia. **(Mobile App released on App Store & Play Store)**

• Sparkling Kids Mobile App & Web (Flutter, Laravel, PT. Pompa DEX Indoguna)

Class schedules & activities management featuring Live Attendance, Parallel Calendar, and AI Report Control Center. **(Mobile App released on App Store & Play Store)**

- **HIPAM Water Bill Payment App** (*Flutter, Laravel, Oracle*)
Mobile app for paying water bills featuring Figma UI design and Laravel backend connected to Oracle DB.
- **GIS-Based Billboard Booking App** (*Flutter, Next.js, Laravel, PostgreSQL*)
Mobile app for booking billboard advertising spaces integrated with Geographic Information System (GIS).
- **College Major Finder Website** (*Laravel, Oracle*)
Interactive platform for high school students to explore college majors with search and campus mapping.
- **Lamongan Culinary Website** (*JavaScript, Java (Spring Boot), MongoDB*)
Local culinary recommendation site integrating NoSQL database and Java Spring Boot.
- **Automated Pharmacy Queuing System** (*HTML, CSS, JavaScript, PHP, MySQL*)
Web-based automated queuing system designed to accelerate patient registration and prescription waiting times.

SKILLS

Web Development: HTML, CSS, JavaScript, PHP, Laravel, Next.js, Java Spring Boot, Python, Bootstrap

Mobile Development: Flutter, Dart, Figma (UI/UX) | **State Management:** GetX, Provider, BLoC

Databases: MySQL, PostgreSQL, Oracle, MongoDB, Supabase

Network & IoT: Linux, TCP/IP, Routing & Switching, Cisco, Mikrotik, Arduino IDE, C++

Version Control & AI Tools: Git, GitHub, Gemini, ChatGPT, Claude Code, DeepSeek

Soft Skills: Teamwork, Leadership, Communication, Critical Thinking, Effective Problem Solving

CERTIFICATIONS & TRAINING

- Author, International Electronics Symposium (IES) 2026, PENS & IEEE Indonesia Section (2026)
- PENS English Proficiency Test (PEPT), Overall Score: 473, PENS Language and Culture Center (2026)
- Final Project Distinction Award, 5 Solae Group (2026)
- 5 Solae Group Internship Batch 4 (2026) & Batch 3 (2025)
- Digital Talent Scholarship (DTS) VSGA - Junior Web Developer, Kominfo (2025)
- LKMM-TD (Basic Student Management Leadership Training), PENS (2024)
