Professional Summary

Graduate from the D3 Informatics Engineering program at Politeknik Elektronika Negeri Surabaya (PENS) with a GPA of 3.60 and a strong interest in Mobile Application Development and Web Development. Experienced in UI/UX Design (Figma) and mobile app development using Flutter & Dart. Also active as a Frontend and Backend Developer utilizing PHP, Laravel, JavaScript, Java, Python, and MySQL. Beyond software development, I have a solid understanding of IT operational support, including basic network management (TCP/IP, Routing & Switching, Mikrotik/Cisco) and troubleshooting skills to maintain system connectivity and stability. Proficient in building dynamic, responsive, and user-friendly applications. Possess strong teamwork, critical thinking, and effective problem-solving skills.

Education

Politeknik Elektronika Negeri Surabaya (PENS) *2023 – 2026*
D3 Informatics Engineering, PSDKU Lamongan — GPA: 3.60 / 4.00

SMA Negeri 1 Ngimbang, Lamongan *2020 – 2023*
Major: Mathematics and Natural Sciences (MIPA)

Experience

Project Digitalization | PT Catur Sentosa Adiprana Tbk *Sep 2026 – Present*

- Architected and delivered **SI-APIK** (Sistem Informasi Administrasi Pengunduran Diri Karyawan), a centralized web-based employee offboarding and clearance management platform.
- Spearheaded the end-to-end UI/UX modernization of the internal corporate HR App Launcher dashboard (**PeopleHub**), transforming legacy navigation into an intuitive card-based portal.
- Implemented robust Single Sign-On (SSO) authentication workflows and role-based access control (RBAC) across 13 master roles and 3 territorial scopes (National, Regional, Branch).
- Formulated enterprise-grade technical documentation including Sequence Diagrams, relational database schemas, and end-to-end security architectures to support seamless organizational scaling.

Software Engineer (R&D Division) | PT. Pompa DEX Indoguna *Jan 2026 – Jul 2026*

- Developed and maintained **Flood Viser**, an internal mobile application used to remotely control and monitor company-owned water pump installations distributed across Indonesia.
- Led the ongoing development and maintenance for the **Sparkling Kids** mobile application and website, including the implementation of Live Attendance and AI Report Control Center features.
- Developed an IoT-based fingerprint attendance kiosk integrated with full-stack web and mobile applications.
- Analyzed and optimized water pump energy consumption through integrated software solutions.

R&D Intern | PT. Pompa DEX Indoguna *Jul 2025 – Jan 2026*

- Initiated the early development of the **Sparkling Kids** platform from scratch, including building business flows, mobile applications, websites, core logic, and database architecture.
- Restructured functional flows and redesigned the user interface on the **Flood Viser** web application to improve usability and system efficiency.

Frontend & Backend Developer | Academic & Personal Projects *2023 – Present*

- Designed user interfaces using Figma and developed the HIPAM water bill payment mobile application using Flutter, Laravel, and Oracle.
- Built an IoT-based automated school bell system controllable via a website, utilizing Arduino IDE, PHP, JavaScript, and MySQL.
- Developed a Laravel-based daily news website with CRUD features and an admin dashboard integrated with MySQL.
- Built a web-based clinic queuing system to expedite patient registration processes using PHP, JavaScript, and MySQL.

Scientific Publications

- **Design and Implementation of an IoT-Based Biometric Attendance Kiosk: A Case Study of Sparkling Kids at PT Pompa DEX Indoguna**
  Published in: **2026 International Electronics Symposium (IES)** • Publisher: IEEE • Yogyakarta, Indonesia (01–03 Aug 2026)
  DOI: https://doi.org/10.1109/IES71033.2026.11702662 • Electronic ISBN: 979-8-3195-0556-9 • Electronic ISSN: 2994-368X

Projects

- **SI-APIK (Employee Offboarding & Clearance Portal)** – *Enterprise HR Module, PT Catur Sentosa Adiprana Tbk*
  Architected a centralized web-based employee resignation and asset clearance management platform, integrating multi-tier approval workflows, role-based access control (RBAC), and exit interview analytics across nationwide branch offices.
- **Flood Viser App & Website** – *Internal Project, PT. Pompa DEX Indoguna*
  An internal web and mobile platform built to remotely control and monitor the performance of company-owned water pumps installed across Indonesia. **(Mobile App released on the App Store & Play Store)**
- **Sparkling Kids Mobile App & Web** – *Flutter, Laravel, PT. Pompa DEX Indoguna*
  An application for managing kids' class schedules and activities, featuring Live Attendance, Parallel Schedule Calendar, and an AI Report Control Center. **(Mobile App released on the App Store & Play Store)**
- **HIPAM Water Bill Payment App** – *Flutter, Laravel, Oracle*
  A mobile application to facilitate customers in paying water bills, featuring an interface designed in Figma and a Laravel backend connected to an Oracle database.
- **GIS-Based Billboard Booking App** – *Flutter, Next.js, Laravel (PHP), PostgreSQL*
  A mobile application for booking billboard advertising spaces integrated with a Geographic Information System (GIS), developed with Flutter for the mobile side, alongside Next.js and Laravel for backend and database management.
- **College Major Finder Website** – *Laravel, Oracle*
  An interactive platform for high school students to choose college majors, equipped with search features and campus mapping.
- **Lamongan Culinary Website** – *JavaScript, Java (Spring Boot), MongoDB*
  A local culinary recommendation site integrating a NoSQL database and Java Spring Boot for backend content management.
- **Automated Pharmacy Queuing System Website** – *HTML, CSS, JavaScript, PHP, MySQL*
  A web-based automated queuing system designed to accelerate patient registration and prescription waiting times at a pharmacy.

Technical Skills

Web Development: HTML, CSS, JavaScript, PHP, Laravel, Next.js, Java Spring Boot, Python, Bootstrap
Mobile Development: Flutter, Dart, Figma (UI/UX)
State Management: GetX, Provider, BLoC
Database: MySQL, PostgreSQL, Oracle, MongoDB, Supabase
Network: Linux, DHCP, DNS, NAT, NTP, CISCO
IoT: Arduino IDE, Sensor Integration, C++
Version Control: Git, GitHub
AI Agents & Tools: Gemini, ChatGPT, Anthropic, Open Code, Claude Code, DeepSeek, Blackbox, Grok

Soft Skills

Teamwork, Communication, Leadership, Critical Thinking, Time Management

Certifications & Training

- Certified General Security Associate (CGSA - CCTV), Hikvision Digital Technology (Nov 2026)
- Webinar: Membangun Bisnis Digital Tanpa Menunggu Modal Besar, PENS (Oct 2026)
- Author, International Electronics Symposium (IES) 2026, PENS & IEEE Indonesia Section (2026)
- PENS English Proficiency Test (PEPT), Overall Score: 473, PENS Language and Culture Center (2026)
- Final Project Award Certificate, 5 Solae Group (2026)
- 5 Solae Group Internship Batch 4 (2026)
- 5 Solae Group Internship Batch 3 (2025)
- Digital Talent Scholarship (DTS) VSGA - Digital Communication, Kominfo (2025)
- Frontend and Backend Developer Training (2024)
- LKMM TD (2024)
- OSJUR IT MMB PSDKU Lamongan (2024)
- LKMM PRA-TD (2023)
